Tips and Tricks

- Fitting to UPVC or aluminium without drilling? That's not a problem, thanks to the special double sided Ellen tape. This is available as an accessory.
- Besides applications in the Professional day care field, schools, hospitals and homes for the elderly, Finprotect Plus is also very suitable for protection of fingers in theme parks and recreation parks.
- For all information on installation situations, check www.finprotectplus.com

Finprotect Plus

Professional protection against trapped fingers

Ellen® Smart profile

www.finprotectplus.com

Professionalism and Safety

Safety management is an important aspect in the professional child care field. However, accidents are also just waiting to happen at schools, hospitals and homes for the elderly, and safety therefore requires constant attention. In this world of litigation, Schools particularly cannot afford to be left open to the charge of being negligent when it comes to ensuring a child's safety whilst in their care. Indeed, the incidence of children being harmed by having fingers trapped in the hinge side of the door is increasing. In the worst cases there have even been horrific incidents of children losing the ends of their fingers.

This needn't happen! Elton has developed Finprotect Plus, the professional solution to prevent painful finger injuries. Tried and tested, sturdy and attractively designed profiles which contribute to a safe living environment.

All the features at a glance

- Prevents fingers getting trapped between the door and frame on the hinge side
- Offers protection on both sides of the door
- Suitable for use internal or external door
- Can be fitted within 20 minutes and can be temporarily removed if required
