DuploCOLL® 17613

High-tech foam for surface protection

Removable protective film

- Temporary and permanent mounting protection, which can be removed without adhesive residue from almost all surfaces (tiles, laminate, parquet, carpet, walls and furniture parts etc.)
- Adhesive on one side, without liner, pre-wound as a roll
- Protected from slipping due to one-sided adhesive surface
- Reliable protection against pressure and impact
- Keeps dust and moisture out
- Also suitable for surface protection of glass, ceramics, wood and metal
- Reusable
- Long-term protection tested on glass
- Non-slip due to rough surface

Fields of application

Suitable for protection during painting, carpentry and varnishing work – scratch protection for surfaces from small, falling objects, suitable as an underlay for other materials.

Product application

- Use on dry, dust- and dirt-free surfaces
- Apply only with suitable pressure, without overstretching the material
- Use at surface and ambient temperatures of +15-35 °C

Product variants		
Name	Material	Adhesive property
DuploCOLL® 17613	1 mm PE foam	removable
DuploCOLL® 17613 X	1 mm PE foam perforated easy to tear off	removable
DuploCOLL® 17613 X	1 mm PE foam die-cut according to customer requirements	removable

Application examples

Installation & Assembly

Sanitary and installation area, protection for window installation

DuploCOLL® 17613 is a perfect protection for high-quality and sensitive floors. Whenever work continues in largely finished rooms, the floor covering must be reliably protected. When working in the bathroom, around showers or in other areas of the home, it is necessary to cover the floors without adhesive residues later causing further reworking. The surface protection must not slip and should be easy to fix to allow safe walking. In addition, the protection should not be applied too thickly so that doors can be operated. The surface protection can be reused several times after removal.

Your benefits

- Works on almost all surfaces (even sensitive furniture surfaces)
- Available in widths of up to 1.5 m
- Quick installation of the protective sheeting due to simple cutting to size and cutting to length
- Low installation thickness of 1 mm
- Repositionable, removable without residue and reusable

Interior installation

Protection for stair treads

Simple protection for stair treads made of glass, stone, painted steel or wood becomes possible with DuploCOLL® 17613. At the end of interior finishing or during renovations, already installed or remaining stair surfaces need to be protected. DuploCOLL® 17613 is easy to cut to size and extremely quick to install as no special tools are required. In contrast to hard protective overlays, the risk of scratching is minimised by the PE foam backing with film reinforcement. For extreme loads or structural work, the protective underlay is also suitable as an intermediate layer for a more solid cover.

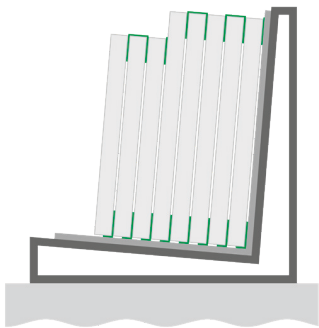

Your benefits

- Residue-free removal from almost all surfaces
- Minimizes the risk of scratches
- Can be used as top or intermediate layer

Transport & Storage

Protection for windows, doors, furniture, sheet metal, glass plates, decorative elements and many more

DuploCOLL® 17613 can be applied precisely for the safe transport of furniture and sensitive goods (e.g. glass, sheet metal, etc.). The self-adhesive surface protection is available in widths of up to 1.5 m and can be reused several times.

Your benefits

- Protective packaging for furniture and sensitive transport goods (e.g. glass)
- Self-adhesive surface protection for everything that is moved
- Securely fixed, no slipping, easy to remove without leaving residue
- Flexible sizes due to simple manual cutting or precise ordering up to 1.5 m wide
- Adheres even when wrapped all around (also sticks to its own material backside when wrapped around)
- Sustainable, as it can be reused several times (after removal, stack and keep ready for the next application)

The best adhesive solution is only the one, that fits your application exactly.
How do we find it?

By advising and supporting you. From the initial idea to integration into your process.

Our philosophy in three words:
Smart Bonding Approach.
